ES6, ES7, ES8... Roadmap

Mark S. Miller
TC39 Meeting, May 2013
ES7 “Concurrency” theme

- parallelism, concurrency, asynchrony, preparation for distribution
- Communicating Event Loop concurrency model,
- Object.observe
- Distribution compatible promise e.g. Promises/A+
- Weak References
ES7 or ES8 Concurrency Theme

• RiverTrail
• The Vat model, inter-vat communications
  – principled alternative of structured clone
  – emphasis being remote object messages,
  – postMessage only one of many transports.
• The promise hooks needed to network
• Event streams
ES8... Concurrency Theme

- SES
- Distributed persistence
- Distributed cryptographic cap protocol
ES7 non-concurrency

- Lexically nested modules
- Completing classes
  - at least high integrity and private state
- Template tags for JS, HTML, CSS
- Full cross-realm object semantics
- Integers, other new values
