

## Annex E (informative)

### Summary of changes in this edition

1. 6.1.1.4.14: Conference Device Category - added conference modeling
2. 6.8: Location Features - added location services modeling clause
3. 7.2: Typo - changed explicit association to implicit association
4. 10.2: DeviceID Tags - added deviceID tags privateNumber and a privateName
5. 12.2.14.4: ErrorCode parameter type - added error codes for Make Connection parameters
6. 12.2.18 & 12.2.19: LocationInfo & LocationInfoList parameter types:
  - a. Added parameter type
  - b. added PIDF Profile Options
7. 13.1.1 Get CSTA Features - added location services to supportedServices parameter
8. 13.1.2 Get Logical Device Information:
  - a. added location services to logDevServList parameter
  - b. added Conference to list of device categories
9. 13.1.3 Get Physical Device Information - added Conference to list of device categories
10. 13.1.5 Get Switching Function Devices - added Conference to list of device categories
11. 13.1.6 Switching Function Devices - added Conference to list of device categories
12. 13.1.4.2.1: Get Switching Function Capabilities:
  - a. added Conference to list of device categories
  - a. added maximum number of maxDestinationDevicesForDeflect parameter for Deflect Call service
  - b. added privateNumber and privateName DeviceID Tags to deviceIDFormat parameter
  - c. added location services to servEvsList parameter
13. 14.2.5: Get Registrations service & 14.2.6: Registration Info service - new services
14. 15.1.4: Get Monitors service & 15.1.5 Monitor Info service - new services
15. 16.1.1: Snapshot Call service - added optional locationInfo parameter to endpoint information in positive response
16. 16.1.3: Snapshot Call Data service- added optional locationInfo parameter to endpoint information in service request
17. 17.1.3: Answer Call service:
  - a. added initiated state to service description text to align with figure 17-3
  - a. added new Make Connection cause to Event Sequence tables
18. 17.1.9: Conference Call service - clarified text allow two connected or two held calls to be conferenced
19. 17.1.11: Deflect Call service - added Deflect to Multiple Destinations feature
20. 17.1.11: Deflect Call service - added callCharacteristics parameter

21. 17.1.19: Make Connection service - new service
22. 17.1.25: Single Step Transfer Call service - added callCharacteristics parameter
23. 17.2: all call control events - added optional LocationInfoList to call control events
24. 17.2.17: Service Initiated event:
  - a. added calledDevice parameter
  - b. added Make Connection to causes
25. 17.2.4.2: Connection Cleared event - added Multiple Alerting cause code
26. 17.2.14.2: Originated event - added Make Connection to causes
27. 19.1.1: Typo - Media Attachment Device changed to Media Access Device
28. 24.1.1 - 24.1.11: Location Services - added service descriptions for location services
29. 24.1.7: Start Location Tracking Service
  - a. added location collection filters
  - b. added PIDF Profile Options in response
30. 27.1.2: Call Detail Records Report - added Conference to list of device categories
31. C.4.1: Capabilities for Snapshot Call service - added optional locationInfoList
32. C.4.3: Capabilities for SnapshotCallData service - added optional locationInfoList
33. C.5.11: Capabilities for Deflect Call service:
  - a. added multiple destination option
  - b. added callCharacteristics parameter option
34. C.5.19: Capabilities for Make Connection service
35. C.5.26: Capabilities for Single Step Transfer Call service - added callCharacteristics parameter option
36. C.6.1: Capabilities for Call Control Events - added locationInfoList as optional parameter for all call control events
37. C.6.17: Capabilities for Service Initiated event - added calledDevice parameter option
38. C.22.1-C.22.12: Capabilities for individual Location Services
39. 10.2: Device Identifier Tags - added deviceID tags to indicate when a deviceID number is private number and when a deviceID name is private
