

**ECMA-141, 2nd edition, Private Telecommunication
Networks (PTN) – Inter-Exchange Signaling –
Data Link Layer Protocol (PTN QSIG-L2)**

SCOPE

This Standard specifies a symmetrical application for inter-PTNX use of the Data Link Layer Protocol specified in ETS 300 125. It can be applicable to certain scenarios which provide a continuous bit stream channel for signaling purposes between two PTNXs, and will be referenced from the standards that specify the scenarios concerned.
