

ECMA-200, Immunity of VDUs to Power Technology Equipment to Lightning Surges

SCOPE

This Standard defines the performance criteria and the procedure for testing the immunity of Information Technology Equipment (ITE) to simulated lightning surges on AC/DC power and telecommunication ports intended for connection to outdoor cables.

NOTE 1:

Any changes from the referenced IEC publication 1000-4-5, which currently has draft status, will be reflected in the future evolution of this Standard.
