

ECMA/TR 28, Safety Verification (Save) Report ECMA-57/IEC 435

SCOPE

This document provides a test protocol for safety verification of equipment complying with IEC Publication 435, 2nd edition, 1983, or with ECMA-57. Such equipment includes all data processing equipment from small desk-top units to large main-frame systems.

This protocol is presented in the form of a check list for type approval in the following logical sequence:

- visual inspection,
- non-destructive testing,
- destructive testing.
