A revised text of ISO/IEC DIS 16262, Information technology — Programming languages, their environments and system software interfaces — ECMAScript Language Specification was circulated as SC 22 N 4595 and the Disposition of Comments as SC 22 N 4579.

The Japanese National Body changed its vote from "disapproval" to "approval" based on discussions at meeting and reviews of the text. They had requested additional editorial corrections which the Project Editor has made and these are reflected in the document via track changes.

Due to the change in this vote, the Ballot Resolution Meeting was no longer needed and the document is able proceed to publication after a final 60-day review period.

No comments were received during this 60-day review period which ended on 11 March 2011.  The document will now be submitted to ITTF for publication.
