Dinner Wednesday evening: <http://www.nycfbllc.com/#/zone8-62/>

A couple of additions to the agenda this week if we have time:

**ES6 feedback via TypeScript:** We have heard a good deal of feedback from users of TypeScript on details of ES6 proposals, particularly on classes and modules. It might be valuable to present this feedback in full separately from individual feature discussions.

**Promises:** There was a long thread on promises on es-discuss recently. It might be valuable to checkpoint on where this stands currently in the committee, and what work champions should pursue on an ES7 track.

#### **4.1 Review of list of Project Proposals for inclusion in ES 6**

<http://wiki.ecmascript.org/doku.php?id=harmony:proposals>

#### **4.2 Review new draft spec**

Changes in recent spec. drafts

Global declaration instantiation added, "global object + lexical scope" model.

Program is now Script

Set/Map size is now an accessor

Set/Map clear method added

Also see spec. change log at

[http://wiki.ecmascript.org/doku.php?id=strawman:syntactic\\_support\\_for\\_private\\_names](http://wiki.ecmascript.org/doku.php?id=strawman:syntactic_support_for_private_names)

What keyword should be used to declare non-private at-name bindings: symbol, unique, sym, public, etc?

#### **4.4 Revisit function parameter scoping and default value rules**

#### **4.11 Go/no-go decision: Eliminate ToUint32 warping on array access**

Sparse parameter on Array iterator constructors (eg. Array.prototype.keys/values/items that determines whether or not "holes" are included in the iteration.?)
