

# **ECMA-200, Immunity of VDUs to Power Technology Equipment to Lightning Surges**

## **SCOPE**

This Standard defines the performance criteria and the procedure for testing the immunity of Information Technology Equipment (ITE) to simulated lightning surges on AC/DC power and telecommunication ports intended for connection to outdoor cables.

### *NOTE 1:*

*Any changes from the referenced IEC publication 1000-4-5, which currently has draft status, will be reflected in the future evolution of this Standard.*
