

ECMA-78, Data Interchange on 130 mm Flexible Disk Cartridges using MFM Recording at 7 958 ftprad on 80 Tracks on Each Side

SCOPE

This Standard ECMA-78 specifies the mechanical, physical and magnetic characteristics of a 130 mm magnetic flexible disk cartridge to provide physical interchangeability between data processing systems. It also specifies the quality of the recorded signals, the track layout and the track format. Together with the labeling system specified in Standard ECMA-67, the track format in this Standard affords for full data interchange between data processing systems.
