## Description

[*Note:* The `System.Net.IWebRequestCreate.Create` method is implemented by types that derive from `System.Net.WebRequest`. The `System.Net.IWebRequestCreate.Create` method is invoked via the `System.Net.WebRequest.Create` method.

Types that implement the `System.Net.IWebRequestCreate` interface are associated with a specific URI scheme and registered with the `System.Net.WebRequest` class. When an application requests a `WebRequest` object for a specific URI, `System.Net.WebRequest` calls the `System.Net.IWebRequestCreate.Create` method of the type associated with the requested URI.
