Summary

This is the base class for code access security attributes.

Inherits From: System.Security.Permissions.SecurityAttribute

Library: BCL

Thread Safety: All public static members of this type are safe for multithreaded operations. No instance members are guaranteed to be thread safe.

Description

[*Note:* The types that derive from `System.Security.Permissions.CodeAccessSecurityAttribute` are used to secure access to resources or securable operations.

The security information declared by a security attribute is stored in the metadata of the attribute target, and is accessed by the system at run-time. Security attributes are used for declarative security only. Use the corresponding permission class derived from `System.Security.CodeAccessPermission` for imperative security.
