System.RuntimeArgumentHandle Structure

```
[ILAsm]
.class public sequential sealed serializable RuntimeArgumentHandle
extends System.ValueType

[C#]
public struct RuntimeArgumentHandle
```

Assembly Info:

- *Name:* mscorlib
- *Public Key:* [00 00 00 00 00 00 00 00 04 00 00 00 00 00 00 00]
- *Version:* 2.0.x.x
- *Attributes:*
  - CLSCompliantAttribute(true)

Summary

A handle that represents a variable-length argument list.

Inherits From: System.ValueType

Library: Vararg

Thread Safety: All public static members of this type are safe for multithreaded operations. No instance members are guaranteed to be thread safe.

Description

This class has no members. It exists solely to support methods that take a variable number of arguments (such as can be written in C/C++).
